RETAINERS

Make The Break From Potentially Dangerous Entanglement

When hazardous situations arise, make sure you're ready to escape. All Gateway Safety protective eyewear retainers are equipped with a built-in breakaway safety feature.

Gateway Safety Eyewear Retainers are comfortable and reliable – featuring either the **QuikPop™** or **QuikRelease™** breakaway feature. They provide superior protection from entanglement while keeping eyewear close at hand.

Plus, when protective eyewear is close at hand, compliance is increased and the potential for lost or damaged PPE is minimized – maximizing your investment in safety.

Gateway
SAFETY
