## Uvex® Lens Coatings

Whether the problem is lenses that fog or lenses that scratch, Uvex lens coatings offer a solution for almost any working environment.

**Uvextreme®** anti-fog coating offers superior performance under the most extreme conditions and will not wear off after repeated cleanings.

**Uvextreme® Plus** offers the same anti-fog performance as Uvextreme, but with extended wear. It is permanently bonded to the lens, which helps it retain its anti-fog, anti-static and UV protection properties.

**Ultra-dura®** anti-scratch hard coat is one of the toughest anti-scratch coatings in the world: permanently bonded to the lens, it offers unparalleled scratch and chemical resistance.

**Supra-Dura®** advanced anti-scratch coating is perfect for high-particulate environments where lens scratching is a severe problem. This coating lasts 5X\* longer than any other anti-scratch coating on the market.

**Dura-streme®** dual coating technology combines the benefits of the Uvex industry leading anti-fog and anti-scratch coatings onto one lens. While the advanced anti-fog properties of Uvextreme help keep the interior of the lens clear from fogging, the rugged properties of Ultra-dura anti-scratch coating protect the exterior of the lens from scuffs and scratches, adding up to 3X\* longer lens life.

\*Comparative lens life test performed using a Bayer Abrasion Test method, and may vary between environment and application.

## Spectrum Control Technology® (SCT)

All Uvex styles are available with an assortment of standard lens tints — both clear and sunglass shades — and many are offered with specialized lens tints designed for task-specific lighting situations. These Spectrum Control Technology (SCT) lens tints incorporate unique dyes in the polycarbonate lens material that absorb select wavelengths of light to enhance vision. The charts on pages 39-41 are designed to help you determine which lens tint best addresses the challenges in your workplace. All Uvex lenses offer 99.9% ultra-violet protection.
