

3M™ Coban™ Self-Adherent Wrap*

The self-adherent elastic wrap that functions like a tape, but sticks only to itself.

1
*Venous Leg
Ulcer Compression*

2
*Surgical Drape
Stabilization*

3
Splint Overwrap

4
*I.V. Catheter
Stabilization*

Features and benefits

- Easily adjustable
- Sticks only to itself; no clips or pins required
- Easily removed from the drapes, hair and skin.
- Can be cut to appropriate length.
- Lightweight, & porous, hence comfortable for patients
- Protects primary dressings
- Maintains degree of compression chosen, doesn't slip like other bandages
- Available in two colors and various sizes (refer to reverse side)

Suggested applications

- Wrapping splints/arm boards
- Compression dressings
- Overwrap for Unna's boot
- Holding other dressings
- Securing I.V.s and other devices especially for combative patients or those with fragile skin
- Sterile drape stabilization and other O.R. Applications

Total knee post-operative dressings
Coban sterile wraps are highly elastic, making them excellent compression wraps to hold post-operative dressings securely in place.

Shoulder arthroscopy
Ideal for securing a patient's arm to a traction device. They are strong like tape, but easier to remove.

Plastic surgery wraps
The sustained compression helps control swelling. They wrap well over hair.

Liposuction post-operative wraps
Provide compression and are easy to adjust. Suitable as initial, doctor-supervised compression wraps for the period between surgery and girdle application.

Vascular post-operative wraps
Allow the surgeon to control the amount of compression and don't slip or require fasteners like other elastic wraps.
