

At ABC Compounding, we recognize the importance of caring for the world's environment as well as ensuring a safer workplace. We take this responsibility seriously and have developed a safer, user friendly product line and commit to keeping it at the leading edge of green technology. Our Earth Force products are manufactured with environmentally preferable chemistry to help ensure a healthier and safer environment.

### Earth Force - Cleaning with the Earth in Mind.

Earth Force products are formulated with the environment and human health strongly in mind and use the following types of ingredients: biodegradable surfactants, with byproducts that are less toxic than the parent compound; solvents that are not hazardous air pollutants and pose no threat to the Earth's ozone layer; fragrances that have been screened for potential hazardous and persistent ingredients; and other components with a more positive environmental profile than in conventional cleaning and floor care products.

### What does the DfE 'Design for the Environment' mark mean?

It assures that the EPA's Design for the Environment (DfE) scientific review team has screened each ingredient for potential human health and environmental effects, and contains ingredients that pose the least concern among chemicals in their class. The DfE mark is an easy way to know you are choosing a product that is as safe as possible for people and the environment.

This product is a liquid concentrated microbial cleaner for use on hard surface floors such as quarry tile and concrete in commercial kitchens and other food preparation areas. It combines biodegradable surfactants for immediate cleaning and a blend of specifically selected microbial cultures that penetrate deep into tile pores for the breakdown of residual organic material. The cleaner is recommended to be emptied down the drain line where it will offer an effective drain and grease trap treatment. Regular use prevents grease build-up, reduces slippery floor surfaces, maintains a sanitary and odor-free floor, reduces organic material buildup in drains, and eliminates conventional hazardous cleaners.
