Description

Chloroflex 723 features 13 inches of 24-mil case hardened, chemically resistant, premium-quality Neoprene. Chloroflex delivers excellent protection from a wide range of oils and chemicals that degrade Natural Rubber, resists the effects of heat, sunlight, ozone and aging and provides good protection against abrasion, cut and puncture. Its tractor-tread finish assures a firm grip, wet or dry, and its flock lining absorbs perspiration, allowing for easier donning and doffing. Chloroflex's ergonomically designed form maximizes worker productivity and comfort. Neoprene is the ideal choice for handling acids and caustics.

Chloroflex II N8 is 18 inches long and 30 mils thick with a rolled cuff. Both are manufactured in compliance with 21 CFR, parts 170 -199 and is acceptable for food handling applications.
