

# liquid/chemical resistant

Constant exposure to water, oils, greases, solvents, and other chemicals can cause a multitude of problems including irritation, burns and contact dermatitis. Wells Lamont liquid and chemical resistant gloves give workers the confidence to perform their jobs effectively and safely.

## Jomac® PVC

Jomac brand liquid and chemical resistant gloves are manufactured using special, ergonomically designed hand forms, which contributes to a better overall fit to the hand. Jomac gloves feature preflexed fingers for increased dexterity and comfort. Most of the Jomac PVC gloves have an antimicrobial treatment to resist mold, mildew and other odor causing agents.

## Flambeau® Lined PVC

The legendary **Bemac Flambeau** protects against harsh winter weather conditions. The heavy weight, red nylon foam insulation doesn't breakdown after reconditioning the material. The gloves are fully lined through the entire glove, including the cuff to help increase thermal properties.

## Neoprene

Neoprene's flexibility is comparable to latex. It has excellent abrasion resistance. It was developed as an oil resistant substitute for natural rubber. A versatile option, neoprene protects against a broad range of chemicals, including: petroleum-based solvents, strong alkalis and oils. It performs well, even in environments that generate temperatures up to 300°F.

## Nitrile

Our nitrile gloves offer an outstanding combination of strength and chemical resistance, especially against animal fats. Disposable nitrile gloves are three times more puncture resistant than latex of the same thickness. This provides unmatched protection from potentially dangerous body fluids. Nitrile is also a great alternative to the traditional use of latex, especially for those allergic to latex material.

## Insulated Liquid-proof: Cold environment products

**PC889L**

**CF2179L**

**BP864L**

### **Bemac Petrochief®**

- Red PVC/NBR blended coating is specifically designed for the petrochemical industry
- Removable washable foam lining keeps hands warm and gauntlet cuff provides additional arm protection
- Treated to resist the growth of mold, mildew and odor causing bacteria
- Sandy finish
- Sold by the dozen pair  
*PC889L, 10½" Glove*

### **Bemac Flambeau®**

- Bemac Flambeau red PVC glove provides maximum protection against liquids in cold and freezing conditions
- Treated to resist the growth of mold, mildew and odor causing bacteria
- Heavy weight nylon foam liner
- Knit wrist cuff
- Sandy finish
- Sold by the dozen pair  
*CF2179L, Knit Wrist, Removable Liner, Size L*

### **Bemac Polarflex<sub>2</sub>®**

- Red PVC/NBR with Polartec® liner
- Treated to resist the growth of mold, mildew and odor causing germs.
- Sandy finish provides better gripping capabilities
- Sold by the dozen pair  
*BP864L, 14" Gauntlet, Size L*
