

# >>> Ankle Supports

Ankle Supports are used for the management of sprains, strains, fractures, ligamentous injuries, and other injuries to the ankle area. The medial and lateral ligaments of the ankle are the most prone to injury. Ankle Supports provide compression and reinforce the ankle and foot muscles that have been stretched or weakened.

## Slip-On Ankle Compression

**1400**

Beige, knitted elastic provides intermediate compression with open toe and heel. Knitted taper for contoured fit.

Size: (Ankle Circumference)

SM	7"-8"
