### Suggested Applications

- Sharp or jagged objects
- Heavy refuse
- Bottles and cans
- Industrial settings
- Miscellaneous refuse
- Outdoor areas
- Food service (white)
- Unsightly refuse

### Product Features

- Interleaved coreless rolls for easy one at a time dispensing
- Simplify and consolidate inventory
- Increased accountability (i.e. contract cleaners)
- Ability to place in multiple locations for convenient access, reducing storage space
- Portion control is easier to monitor, reducing theft
- Interleaved means no perforations, which eliminates unnecessary strain on bottom seals
- Multi-layered Star Seal bottom
- Easy to handle by hand or dispenser
- Unique market concept
- Creates a Private Branded identity

### Suggested Applications

- Heavy, wet refuse
- Temperature extremes, -40° to 212°F
- Excellent odor confinement
- Excellent liquid confinement
- Food storage applications (Natural/Clear only)
- USDA and FDA approved for food use (Natural/Clear only)
- Packaging applications
- Small office receptacles - lightweight refuse

## Innovative Product Solutions

The can liner landscape is cluttered with a variety of different products. Trying to select and purchase the right product for the right application is confusing. If you choose wrong, it could cost you customers. Proper can liner selection should be a simple process, but it is more than just putting any can liner in any receptacle.

Now we have made the process simple for you! Introducing Custom Liner Solutions, a private label can liner program designed to bring you effective products that both fit your needs and eliminate the confusion.

We have taken the liberty of consolidating our extensive can liner offering into a simple easy to use product offering. We recommend these products because they cover the needs of virtually every workplace situation, with only a handful of products. We still have all the products you have used over the years, we are simply making the process easier for you. This educated selection of products eliminates costly product duplications while enabling you to find the perfect product for the required application. Thus resulting in reduced inventories, more manageable procurement cycles, reduce warehouse space and more effective selling.

## Sales & Marketing Tools

Custom Liner Solutions provides hands-on solutions to help make your understanding of our product line easier. This understanding of our products and capabilities will play a key role in assisting your individual business plan. This program is our latest commitment to enable you to find the products that work best for you - more quickly and easily than ever. We believe these tools will make our customers the most informative in the industry.

Our Pitt Plastics team of manufacturer reps are service-oriented people who represent our deepest level of commitment to you. These reps are available to visit you on site to personally educate you on our product line and, of course, help you determine how we can best satisfy your can liner needs.

Pitt Plastics is dedicated to making sure you have every resource needed to help you reach your sales goals.

## OUR UNCONDITIONAL GUARANTEE

We guarantee all our fine products in writing and stand behind them without fail. We not only guarantee our can liners' outstanding quality, we also guarantee:

- The seals of our bags are engineered to be as puncture resistant as any other portion of our bag.
- The measurements on the label accurately represent the exact size, strength, and case count held within.
- Our packaging is designed to be crush-resistant so our bags will arrive protected and enclosed in an easy-to-use container.
