

LOW-MOISTURE, WALK THROUGH

Automatic Boot Sanitizing Station

An effective tool for reducing pathogens in:

- Food processing plants
- Nutraceutical facilities
- Pharmaceutical plants
- Clinical research labs

The new **HACCP Defender™** from Best Sanitizers is designed for facilities where pathogen reduction and moisture control is critical. Utilizing the proven efficacy of Alpet® D2 Surface Sanitizer, facilities now have a powerful tool for controlling pathogens and reducing cross-contamination.

*Adding a floor mat with **Alpet® Dry Step** cleaning powder provides a sure-footed surface for exiting the sanitizing station.*

Features

- One-way, walk through design supports traffic flow and improves pathogen reduction in critical areas of the facility
- Fine atomized mist provides ample coverage to footwear soles while reducing chemical waste and controlling moisture
- Adjustable output for optimal volume control
- Infrared sensors control doors and sprayers
- Fresh Alpet D2 Surface Sanitizer with every application
- Stainless steel construction
- Dimensions: 36"W x 38"L x 45"H
- Made in the USA

Complete, Confident, Compliant.

THE ORIGINAL

Ready-To-Use, No-Rinse Sanitizer For Food Contact Surfaces

Alpet® D2 is ideal for water sensitive equipment. It is highly evaporative, non-corrosive and fast-acting. Alpet D2 sanitizes in 60 seconds. With an NSF registered D2 classification, this one-of-a-kind product is powerful enough to kill Norovirus, yet safe enough to use on food-contact surfaces without a rinse.

- Kills 99.999% of tested bacteria and viruses
- Proven rubber boot and rubber glove sanitizer
- NSF and EPA registered
- Ready-to-use, no-rinse, food contact surface safe
- 58% IPA/quat formula
- Kosher certified and Pareve

ALPET
Surface Sanitizer **D2**

BEST SANITIZERS INC.
ALPET
Dry Step
Floor Treatment

The formula for Alpet® Dry Step is the first granular floor treatment that combines alkalinity and multiple oxidizing compounds for superior performance. When activated, this product generates hydrogen peroxide and oxygen. Alpet Dry Step's alkalinity and accelerants greatly increases chemical activity and oxygen-release rate. Surfactants ensure that this product will penetrate into all cracks, crevices, and porous surfaces where conventional floor treatments do not.

Use as: Floor Treatment • Drain Treatment • Entryway Treatment

We recommend adding Alpet Dry Step to a floor mat to provide a sure-footed surface for exiting the HACCP Defender Boot Sanitizing Station.
