Description

This rugged 100% Neoprene glove is suitable for many heavy-duty applications including but not limited to pellet-blasting and sandblasting. Available either smooth finished or with a special rough textured grip, the glove is very durable and is launderable. Its five-piece flannel liner helps keep you cool and comfortable in hot conditions or warm in cold conditions. Neoprene is the ideal choice for handling acids and caustics. Best Neoprene gloves are available in several different lengths and cuffing configurations including shoulder-length and is manufactured in compliance with 21 CFR, parts 170-199 and is acceptable for handling applications except for 6799R which contains Kevlar®.

Suggested Applications

- Manufacturing
- Food Processing
- Battery Manufacturing
- Paper Pulp Processing
- Sand Blasting
- Pellet-Blasting Applications
- Masonry and Concrete
- Hexavalent Chromium Protection
- Limited Heat Resistance to Intermittent Contact up to 350°F

This list of suggested applications is partial and based on laboratory testing of glove performance. For a complete list of suggested applications, visit our website: [www.showabestglove.com](http://www.showabestglove.com)

ANSI/ISEA 105-2005 Performance

- Abrasion
- Cut Resistance
- Puncture
