**WASHING INSTRUCTIONS**

Always wash similar products of the same materials together. This will eliminate different material types from being effected by non-recommended chemicals. Rinse all gloves thoroughly in cold water to ensure the release of particles in the products. If pre-soaking use luke warm water to ensure good particle softening. Mild detergents or chemicals should be used to enhance the laundering process. All products should be laundered using a mild soap and detergent. Use a warm water wash with a temperature not to exceed 160°F (71°C). Wash time should not be longer than 15 to 20 minutes. Use a rinse cycle for the product in cold water. Repeat above as often as needed to ensure a thoroughly clean product. It is important to use a high extraction speed to thoroughly remove all excess moisture. Tumble dry glove in a temperature not higher than 150°F (67°C) for a time of 15 to 20 minutes; adjustments in dry time may increase depending on quantity and weight of the products. Temperatures should not exceed 150°F (67°C).

**CAUTION**

Gloves are cut resistant but are not cut or puncture-proof. Do not subject to high-speed, serrated blades or intentional slashings.
