## Aluminum .040

.040 aluminum has baked-on enamel on both sides, allowing it to be printed on both sides. It is weatherproof and non-corrosive, making it ideal for indoor and outdoor use. Signs are supplied with radius corners and pre-drilled corner mounting holes. Excellent for placement on a wall or fence.

Highway and Parking

## Aluminum .063

.063 aluminum has baked enamel on both sides, allowing it to be printed on both sides. It is weatherproof and non-corrosive, making it ideal for permanent indoor and outdoor use. Signs are supplied with radius corners and pre-drilled mounting holes. Excellent for post mounting.

Highway and Parking

## Aluminum Engineer Grade Reflective

Reflective vinyl sheeting applied to .080 aluminum. It is weatherproof and non-corrosive making it ideal for permanent outdoor applications. Signs are supplied with radius corners and pre-drilled mounting holes.

Highway and Parking

## High Intensity Reflective Aluminum

High intensity reflective sheeting applied to .080 aluminum is designed to meet MUTCD requirements, making it ideal for traffic control and work zone signs. High Intensity Reflective Aluminum provides long term reflectivity and is available in yellow, white and lime yellow.
