

definition

bioremediation:
the use of biological agents, such as microbes or plants, to remove or neutralize contaminants.

how it works

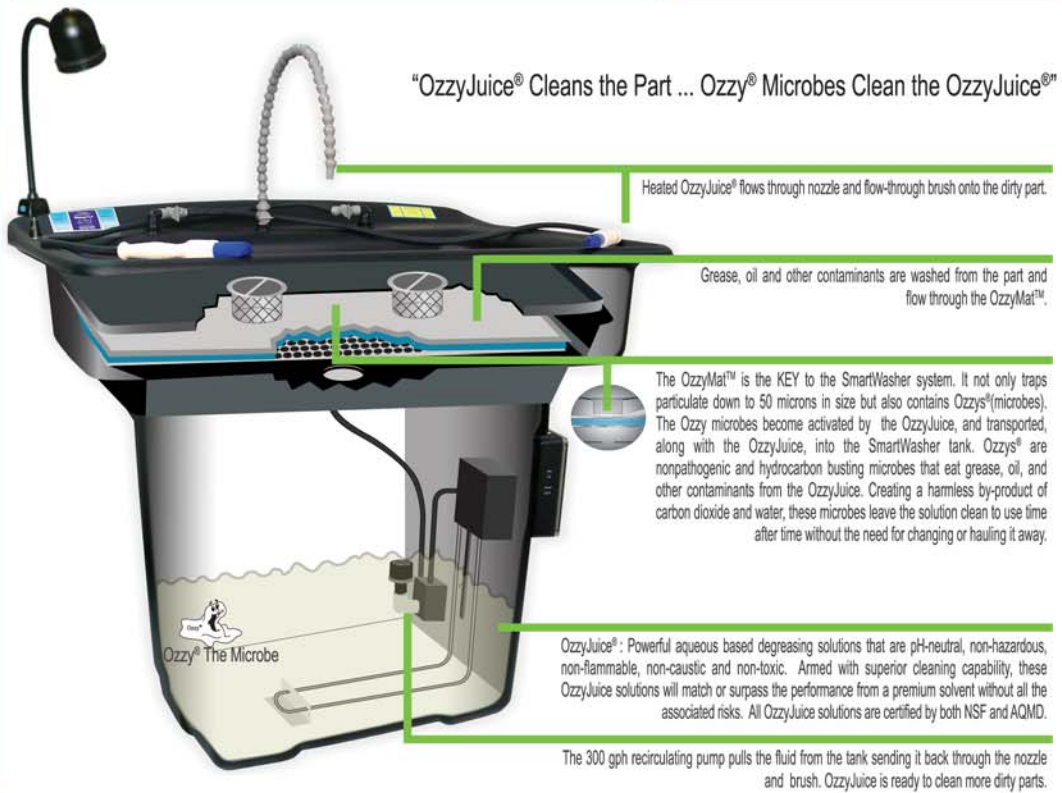

The SmartWasher Bioremediating Parts Washing System is both self-cleaning and deregulated. Utilizing the natural occurring process of bioremediation, the SmartWasher constantly maintains the cleanliness of the OzzyJuice without the need for hauling, skimming or evacuating the unit. The microbes (Ozzys®) in the system eat the grease, oil and other contaminants, turning these hazardous materials into a harmless by-product of carbon dioxide and water. Eliminating the need for hauling liquid hazardous waste, this amazing process keeps the OzzyJuice clean and strong for every use.

benefits

- NO Flash Point
- NO Waste Hauling
- NO Toxic Solvents
- NO Environmental Damage
- NO Health & Safety Hazards
- NO Liquid Hazardous Waste
- NO Cradle to Grave Liabilities

- 300 gph Pump
- Flow Control Timer
- HDPE Construction
- Onboard Diagnostics
- 500 lbs. Load Capacity
- Adjustable Thermostat

SmartWasher Models

Mobile Parts/ Brake Washer	Signature Parts Washer	Combo Brake/ Parts Washer	SuperSink Parts Washer	SuperSink XE Parts Washer	OzzyJuice & OzzyMat

The EPA's Design for the Environment Program (DfE) has awarded ChemFree Corporation's proprietary SW-4 Heavy Duty OzzyJuice® degreasing solution their seal of approval. The DfE Program restricts the use of their logo to products thoroughly assessed by their DfE scientific review team and proven to contain the safest possible ingredients.

Merging Science and Technology

through the process of bioremediation the patented SmartWasher system eliminates the need to haul away used fluid.

The SmartWasher®

constructed from heavy duty HDPE, contains a large 300 gph pump, adjustable thermostat, fluid level sensor and on-board diagnostics.

The OzzyJuice®

degreasing solutions that are pH neutral, use no hazardous solvents, are not caustic and have no flash point. These powerful degreasing solutions clean as quickly as premium solvents.

The OzzyMat™

patented particulate trap impregnated with microbes (Ozzys®). The OzzyMat traps large particles of grease and oil along with other particulate matter larger than 50 microns. More importantly, the OzzyMat releases these microbes (Ozzys® microbes) into the SmartWasher system. The microbes (Ozzys) break down or "eat" grease, oil and other contaminants in the OzzyJuice and the result is harmless carbon dioxide and water. EVAPORATION. This process leaves the OzzyJuice clean and strong for every use.

The SmartWasher® Bioremediating parts washing system

one amazing bioremediating parts washing system, As long as our customers maintain their SmartWasher system properly they should never have to change or haul away dirty parts washing fluid again.]
