

A Cool Advance in Head Protection

NEW!

Vented V-Gard® Advance™ Cap

[Improves air circulation and comfort]

V-Gard Advance Caps come in a variety of colors

V-Gard Advance Caps are not specifically designed to protect against lateral blows from the front, side, or rear. MSA's Vanguard™ Protective Helmets are so designed and must be used if lateral protection is desired. For more information, contact your MSA distributor.

V-Gard Advance Caps are MSA's latest combination of advanced features:

- Cooling vents for improved air circulation
- Lightweight design for added comfort
- Lateral contours above the ear for easy integration of hearing protection
- Optional 4- or 6-point suspension system
- Glaregard™ underbrim to reduce reflective glare
- Custom imprinting available

V-Gard Advance Caps feature advanced styling with venting along the crown for improved air circulation. V-Gard Advance Caps consist of an ABS shell and either a 4- or 6-point Fas-Trac® Ratchet Suspension (with soft, absorbent sweatband) that work together as a protective system.

V-Gard Advance Caps meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-1997, **Class C**.
