

**The Perfect Companion To the
CK5000 Vinyl Glove**

Foil strip makes
this sleeve
highly detectable

Detectamet™ Metal Detectable Sleeves

An Exclusive from Detectamet

The perfect companion to the CK5000 metal detectable glove, the Detectamet Metal Detectable Sleeve extends the concept of "due diligence" by expanding a worker's protective coverage from the wrist to elbow. The sleeve is metal detectable by a foil strip (which is to be worn inside next to clothing) and is visual detectable blue 20 micron LDPE (Low Density Polyethylene). These metal detectable sleeves have elastic at both ends for a snug, immovable but comfortable fit. Seams are heat-sealed to prevent seepage. These sleeves are perfectly suited for the food and meat processing, pharmaceutical and the beverage manufacturing industries. Sleeves are ideal for wet environments to protect workers clothing, and help keep first aid bandages dry and away from the production and process areas. Sold in pack of 100 (50 pair).

Features & Benefits

- Disposable 20 micron LDPE
- 7" x 15" in Length
- Blue for visual recognition
- 100 per pack
- Available in Blue, Red and White
- ISO 9001:2000 accredited

• Available Colors:

Detectable Glove Clips *Gloves Will Never Be Lost Again!*

Metal Detectable Glove Guard™

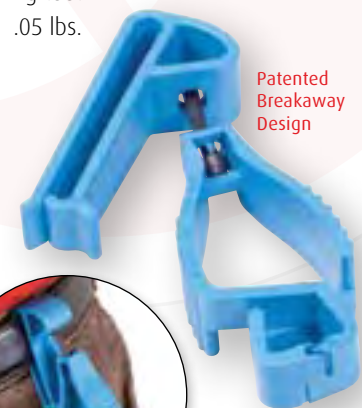

The original glove clip and the only one with the patented safety breakaway design. Using these products can drastically reduce glove replacement costs and hand injuries because workers will have their gloves with them when needed. With the Metal Detectable version, these products are perfect to help prevent contamination and product loss within the food production and process areas, where gloves and other products are removed throughout the day. Their Strong interlocking teeth put a grip on gloves towels, earmuff or other products. .05 lbs.

Glove Guard™

Metal Detectable Utility Guard™

features the same safety features and robust design as the Glove Guard™ but uses a belt clip instead of a small clamp to attach directly to the user. .05 lbs.

Patented
Breakaway
Design

Metal Detectable Handi Klip™

The Handi Klip uses a ball and socket joint that allows each end to rotate freely. Each side features oversized jaws like the Glove Guard, to fit even the bulkiest gloves, towels, earmuffs, and other products that you need to stay out of the production process. .05 lbs.

Utility Guard™

Patented Safety Breakaway Design *

Helps prevent an individual from being pulled off balance if gloves or other products snags while climbing, crawling or caught in machinery.

Features & Benefits

- Highly Detectable
- A Great Glove Accessory
- Patented Breakaway Design *
- Strong Grip Jaws
- Interlocking Teeth
- Quality High Grade Material
- Ball & Socket Joint **

* Glove Guard™ and Utility Guard™ only
** Handi Klip™ only

Ball & Socket Joint
