

DIAMOND SWITCHBOARD MATTING (Specialty)

Diamond Switchboard Matting is a non-conductive floor matting made from a PVC compound, designed to provide insulation for the worker. The mat prevents the worker from being grounded, thereby eliminating the possibility of electrical shock. The diamond plate top surface provides increased traction, and is easy to sweep clean.

Where to use:

Switchboard matting can be used in dry environments in front of high voltage boxes, electrical fuse boxes, and transformers.

Product info:
