Whizard metal mesh should be cleaned each time after use by hand or a glove tumbler. Mesh should be washed in warm water not to exceed approximately 125°F. Commercial detergents are recommended. Do not use a detergent that contains acid and/or chlorine. Mesh should not be hit on any objects such as a wall to remove the particles from the glove, this will damage the product. After washing, hang or suspend glove in a dry well vented area, preferably in a storage cabinet.

CAUTION

Gloves are cut resistant but are not cut or puncture-proof. Do not subject to high-speed, serrated blades or intentional slashings.
