Helium™ 15

ALL Eyewear is Shown with Blue 80% VLT 'Indoor Tint'

DetectSpecs™ Series

The Food/Pharma Industry needs to detect any contamination that could possibly occur during the manufacturing process.

This series provides that solution for you!

Product Features:

- Three lightweight, attractive, cost effective models with metal detectable temples, provides compliance for all workers: Helium™ 15, Helium™ 18, OVR-Spec™ III.
- Helium™ 15 and Helium™ 18 are the lightest weight, most secure fitting and comfortable spectacles in their class for excellent worker compliance.
- OVR-Spec™ III provides a lightweight 'Over the Glass' solution for workers wearing prescription eyewear.
- All DetectSpecs™ Eyewear have metal infused blue temples that provides visual detection, magnetic and x-ray detectability. Elvex exclusive Blue 80% VLT 'Indoor Tint' offers some level of visual detectability while still providing high VLT for indoor use in adequate lighting. Test report is available on request.
- Quattro™ Reusable Plug features a FULLY metal detectable ear plug and cord compared to competitors having limited detectability! All earplug sections/parts are detectable!
- The Quattro™ offers an improved design and better attenuation. Quattro™ is fully metal detectable versus the older style plugs that have a metal ball in the center of the plug. When most brands in the marketplace offer only 25 NRR vs. QUATTRO 27 NRR / 34 SNR!

Other Key Product Features

- Eyewear:
 - DetectSpecs™ Eyewear also features our SuperCoat™ washable Anti-Fog lens coating for excellent durability and long lasting anti-fog performance required by most industries.
 - Elvex® SuperCoat™ is a washable anti-fog coating with anti-static and anti-scratch protection.
 - Polycarbonate lenses absorbs 99.9% of harmful UV A, B and C, 180-380nm.
- Hearing:
 - The Quattro EP-416 has tiny metal specs embedded during manufacturing process. This insures that every part/section of the plug is “FULLY” metal detectable.

⇒ Earplug Flanges, Handle and PVC cord are FULLY metal detectable!
 - Contoured 4-flange, made of advanced non-allergenic polymer material non-irritating, resistant to ear wax and body oils; outlasts PVC ear plugs.
 - Delivers all-day comfort and superior attenuation.
 - Washable, reuse for weeks with no loss of comfort or effectiveness.

Ordering Information

Product No.	Product Description
SG57BMDAF	OVR-Spec III, Blue 80% VLT SuperCoat AF/PC lens, Blue Adjustable Length Metal Detectable Temples. Fits over Rx Frames up to 140 mm wide.
SG58BMDAF	Helium 15, Blue 80% VLT SuperCoat AF/PC lens, Blue Adjustable Length Metal Detectable ErgoFit™ Temples.
SG59BMDAF	Helium 18, Blue 80% VLT SuperCoat AF/PC lens, Blue Adjustable Length Metal Detectable ErgoFit™ Temples.
EP-416	Quattro™ Reusable Corded (PVC cord) Fully Metal Detectable Ear Plug and Cord, steel blue, 100pr/bx, SNR 34, NRR 27
