

Introducing

niroflex mesh glove tensioners

Even though our mesh gloves are the most ergonomically correct mesh gloves in the world, the loose nature of ring mesh can still be a challenge for proper fit. We now offer a simple, sanitary polymeric mesh glove tensioner that fits over the mesh glove on the back of the hand and provides a tighter fit for the working area of the palm and fingers without hindering comfort or dexterity.

Catalog item GS-100 – packed and sold per package of 100 tensioners.
