

UST Detail Brush

Series 555130

UST Hygienic Design

Rounded edges, a smooth surface, and no sharp angles limit areas for food particles and bacteria to collect and hide

Hanging Hole

The specially shaped hanging hole allows water to drain out easily over the brush head, while the hole itself makes storage easy

Enhanced Bristle Security

The fully-molded enhanced bristle security unit makes bristle retention even better, all without metal staples or resin

The UST Detail Brush is designed for detail cleaning in dry environments where soft bristles are useful and hygiene is critical, such as when cross-contact from allergens are a risk. The brush is also useful as a pastry or glazing brush in food handling applications. This brush delivers all the advanced benefits of Vikan's other UST cleaning tools.

UST Detail Brush

555130

This brush is FDA compliant and available in 8 colors. The hygienic design of the brush means that it is safe to use in situations where hygiene is of the utmost importance. The enhanced bristle security provides greater bristle retention without using metal staples or resin.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
